From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence Jan Holler, Vlasios Tsiatsis, Catherine Mulligan, Stefan Avesand, Stamatis Karnouskos, David Boyle

This book outlines the background and overall vision for the Internet of Things (IoT) and Machine-to-Machine (M2M) communications and services, including major standards. Key technologies are described, and include everything from physical instrumentation of devices to the cloud infrastructures used to collect data. Also included is how to derive information and knowledge, and how to integrate it into enterprise processes, as well as system architectures and regulatory requirements. Real-world service use case studies provide the hands-on knowledge needed to successfully develop and implement M2M and IoT technologies sustainably and profitably. Finally, the future vision for M2M technologies is described, including prospective changes in relevant standards. This book is written by experts in the technology and business aspects of Machine-to-Machine and Internet of Things, and who have experience in implementing solutions.

- Standards included: ETSI M2M, IEEE 802.15.4, 3GPP (GPRS, 3G, 4G), Bluetooth Low Energy/Smart, IETF 6LoWPAN, IETF CoAP, IETF RPL, Power Line Communication, Open Geospatial Consortium (OGC) Sensor Web Enablement (SWE), ZigBee, 802.11, Broadband Forum TR-069, Open Mobile Alliance (OMA) Device Management (DM), ISA100.11a, WirelessHART, M-BUS, Wireless M-BUS, KNX, RFID, Object Management Group (OMG) Business Process Modelling Notation (BPMN)
- Key technologies for M2M and IoT covered: Embedded systems hardware and software, devices and gateways, capillary and M2M area networks, local and wide area networking, M2M Service Enablement, IoT data management and data warehousing, data analytics and big data, complex event processing and stream analytics, knowledge discovery and management, business process and enterprise integration, Software as a Service and cloud computing
- Combines both technical explanations together with design features of M2M/IoT and use cases. Together, these descriptions will assist you to develop solutions that will work in the real world
- Detailed description of the network architectures and technologies that form the basis of M2M and IoT
- Clear guidelines and examples of M2M and IoT use cases from real-world implementations such as Smart Grid, Smart Buildings, Smart Cities, Participatory Sensing, and Industrial Automation
- A description of the vision for M2M and its evolution towards IoT

From reader reviews:

Lucas Florio:

Have you spare time for just a day? What do you do when you have considerably more or little spare time? That's why, you can choose the suitable activity with regard to spend your time. Any person spent their own spare time to take a wander, shopping, or went to the actual Mall. How about open or even read a book eligible From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence? Maybe it is to be best activity for you. You already know beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have other opinion?

Dan Fry:

Book is to be different for each grade. Book for children until eventually adult are different content. As we know that book is very important normally. The book From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence had been making you to know about other expertise and of course you can take more information. It doesn't matter what advantages for you. The book From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence is not only giving you much more new information but also being your friend when you truly feel bored. You can spend your own personal spend time to read your publication. Try to make relationship with all the book From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence. You never really feel lose out for everything when you read some books.

Jennifer Klein:

Don't be worry when you are afraid that this book can filled the space in your house, you could have it in e-book means, more simple and reachable. This From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence can give you a lot of friends because by you checking out this one book you have point that they don't and make you actually more like an interesting person. This kind of book can be one of a step for you to get success. This publication offer you information that perhaps your friend doesn't recognize, by knowing more than additional make you to be great men and women. So , why hesitate? Let me have From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence.

Monique Hightower:

Some individuals said that they feel fed up when they reading a reserve. They are directly felt it when they get a half areas of the book. You can choose the actual book From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence to make your own personal reading is interesting. Your own skill of reading talent is developing when you just like reading. Try to choose easy book to make you enjoy to read it and mingle the feeling about book and reading through especially. It is to be very first

opinion for you to like to open a book and examine it. Beside that the guide From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence can to be your new friend when you're really feel alone and confuse using what must you're doing of this time.
