Geographic Information Systems in Oceanography and Fisheries

Vasilis D. Valavanis

Geographic Information Systems in Oceanography and Fisheries Vasilis D. Valavanis

Over the last two decades there has been increasing recognition that problems in oceanography and fisheries sciences and related marine areas are nearly all manifest in the spatio-temporal domain. Geographical Information Systems (GIS), the natural framework for spatial data handling, are being recognized as powerful tools with useful applications in marine sciences. *Geographic Information Systems in Oceanography and Fisheries* provides a thorough examination of marine GIS applications that include a wide variety of methods and sophisticated approaches in coastal, continental shelf, and deep ocean studies. It presents new innovative approaches of using GIS in the examination of the dynamic relations that characterize the marine world, including marine GIS macro routines for the development of oceanography and fisheries GIS tools and applications.

This book is divided into four parts. The first gives an overview of marine GIS, including conceptual issues on marine spatial thinking and models of marine GIS development. The second and third parts examine the main sampling methods and online sources of spatially referenced data, and discuss application examples and innovative approaches in GIS developments for many oceanographic and fisheries tasks. The fourth part presents GIS technical issues by listing marine GIS routines for a wide array of GIS tasks.

Anyone with interests in marine GIS development, physical and biological oceanography, fisheries and information based proposals for ocean and fisheries resource management will find this book useful.

From reader reviews:

Margaret Head:

Reading a publication tends to be new life style with this era globalization. With looking at you can get a lot of information that can give you benefit in your life. Together with book everyone in this world could share their idea. Ebooks can also inspire a lot of people. Plenty of author can inspire their reader with their story or maybe their experience. Not only the storyplot that share in the books. But also they write about the information about something that you need example. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors on earth always try to improve their talent in writing, they also doing some research before they write to the book. One of them is this Geographic Information Systems in Oceanography and Fisheries.

Cleveland Bolton:

A lot of guide has printed but it differs from the others. You can get it by world wide web on social media. You can choose the best book for you, science, comic, novel, or whatever by simply searching from it. It is known as of book Geographic Information Systems in Oceanography and Fisheries. You can include your knowledge by it. Without making the printed book, it could possibly add your knowledge and make you happier to read. It is most critical that, you must aware about reserve. It can bring you from one place to other place.

Mary McClellan:

What is your hobby? Have you heard which question when you got students? We believe that that question was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. Therefore you know that little person similar to reading or as looking at become their hobby. You need to understand that reading is very important as well as book as to be the factor. Book is important thing to include you knowledge, except your teacher or lecturer. You see good news or update about something by book. A substantial number of sorts of books that can you choose to adopt be your object. One of them is this Geographic Information Systems in Oceanography and Fisheries.

Sally Kim:

Reading a e-book make you to get more knowledge as a result. You can take knowledge and information from your book. Book is composed or printed or highlighted from each source in which filled update of news. Within this modern era like right now, many ways to get information are available for you. From media social including newspaper, magazines, science book, encyclopedia, reference book, book and comic. You can add your understanding by that book. Are you hip to spend your spare time to open your book? Or just in search of the Geographic Information Systems in Oceanography and Fisheries when you required it?
