Geography at University will show students how to do better at university when studying for their degree in geography.

It explains how university - and geography at university - differs from the subject at school. At university, students are taught new topics in different ways and will be tested on different abilities - the ability to understand, to explain and to apply knowledge; rather than just on the knowledge itself. This means that students need to learn the subject in new ways: **Geography at University** shows them exactly how to do that.

Being at university is a phase between school and career, this book will show students how university geography builds on school geography and gives them skills employers will be looking for when appointing graduates.

Geography at University reviews each of the main methods by which students are taught geography - lectures, tutorial, fieldwork, practicals and projects - and explains what tutors will be trying to do during these sessions so that students can gain the most from teaching.

Geography at University explains what tutors are looking for when assessing students works through their essays, examinations, oral presentations and dissertations.

There is more to getting a degree than just studying geography. There is much that students can do through a gap year or taking paid or voluntary work to give them an edge when applying for jobs after graduation, and **Geography at University** explains how they can make the most of these opportunities as well.
