Mechanisms in Homogeneous and Heterogeneous Epoxidation Catalysis

Mechanisms in Homogeneous and Heterogeneous Epoxidation Catalysis

The catalytic epoxidation of olefins plays an important role in the industrial production of several commodity compounds, as well as in the synthesis of many intermediates, fine chemicals, and pharmaceuticals. The scale of production ranges from millions of tons per year to a few grams per year. The diversity of catalysts is large and encompasses all the known categories of catalyst type: homogeneous, heterogeneous, and biological. This book summarizes the current status in these fields concentrating on rates, kinetics, and reaction mechanisms, but also covers broad topics including modeling, computational simulation, process concepts, spectroscopy and new catalyst development. The similarities and distinctions between the different reaction systems are compared, and the latest advances are described.

- * Comprehensive listing of epoxide products
- * Broad comparison of turnover frequencies of homogeneous, heterogeneous, main-group, biomimetic and biological catalysts
- * Analysis of the general strengths and weaknesses of varied catalytic systems
- * Detailed description of the mechanisms of reaction for classical and emerging catalysts

From reader reviews:

Bettye Heinrich:

Often the book Mechanisms in Homogeneous and Heterogeneous Epoxidation Catalysis will bring someone to the new experience of reading a book. The author style to elucidate the idea is very unique. Should you try to find new book you just read, this book very acceptable to you. The book Mechanisms in Homogeneous and Heterogeneous Epoxidation Catalysis is much recommended to you you just read. You can also get the e-book from official web site, so you can easier to read the book.

Major Talley:

Spent a free a chance to be fun activity to try and do! A lot of people spent their free time with their family, or their own friends. Usually they performing activity like watching television, going to beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Will you something different to fill your own personal free time/ holiday? Could possibly be reading a book might be option to fill your no cost time/ holiday. The first thing you ask may be what kinds of book that you should read. If you want to attempt look for book, may be the guide untitled Mechanisms in Homogeneous and Heterogeneous Epoxidation Catalysis can be great book to read. May be it might be best activity to you.

Jeffrey Call:

It is possible to spend your free time you just read this book this e-book. This Mechanisms in Homogeneous and Heterogeneous Epoxidation Catalysis is simple to deliver you can read it in the recreation area, in the beach, train as well as soon. If you did not get much space to bring the particular printed book, you can buy the actual e-book. It is make you much easier to read it. You can save the particular book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

Wendy Fuller:

On this era which is the greater particular person or who has ability to do something more are more important than other. Do you want to become one among it? It is just simple approach to have that. What you must do is just spending your time very little but quite enough to get a look at some books. One of the books in the top collection in your reading list is definitely Mechanisms in Homogeneous and Heterogeneous Epoxidation Catalysis. This book that is certainly qualified as The Hungry Hillside can get you closer in turning out to be precious person. By looking upwards and review this guide you can get many advantages.
