Data Analysis and Visualization in Genomics and Proteomics

Data Analysis and Visualization in Genomics and Proteomics is the first book addressing integrative data analysis and visualization in this field. It addresses important techniques for the interpretation of data originating from multiple sources, encoded in different formats or protocols, and processed by multiple systems.

- One of the first systematic overviews of the problem of biological data integration using computational approaches
- This book provides scientists and students with the basis for the development and application of integrative computational methods to analyse biological data on a systemic scale
- Places emphasis on the processing of multiple data and knowledge resources, and the combination of different models and systems
