## **Death Investigation: An Introduction to Forensic Pathology for the Nonscientist** Ann Bucholtz

*Death Investigation: An Introduction to Forensic Pathology for the Nonscientist* provides students and law enforcement professionals with an accurate, clear overview of forensic pathology. It presents death investigation at the scene and autopsy, providing readers with a broad understanding of forensic pathology and giving them a clear picture of what happens after the examination of the scene. Readers learn what first responders should (and should not) do at the scene, and get a forensic pathologist's perspective on the importance of preserving evidence. *Death Investigation* methodically explains what happens during autopsy to determine cause and manner of death — including particulars of blunt force trauma, sharp force injuries, asphyxia, and gunshot wounds — and how findings are presented in court. Written for a criminal justice audience by a practicing forensic pathologist and educator, *Death Investigation* makes challenging forensics concepts accessible to nonscientists.
