## Geocoding Health Data: The Use of Geographic Codes in Cancer Prevention and Control, Research and Practice

In the past, disease pattern mapping depended on census tracts based on political units, such as states and counties. However, with the advent of geographic information systems (GIS), researchers can now achieve a new level of precision and flexibility in geographic locating. This emerging technology allows the mapping of many different kinds of geographies, including disease rates in relation to pollution sources.

Geocoding Health Data presents a state-of-the-art discussion on the current technical and administrative developments in geographic information science. In particular, it discusses how geocoded residential addresses can be used to examine the spatial patterns of cancer incidence, staging, survival, and mortality.

The book begins with an introduction of various codes and their uses, including census geographic, health area, and street level codes. It goes on to describe the specific application of geocodes to cancer, detailing methods, materials, and technical issues. The text illustrates how to compile data maps for analysis and addresses issues, such as mismatch correction and data quality. It describes the current state of geocoding practices and discusses the use of individually geocoded cancer incidences in spatial epidemiology, distance estimation and spatial accessibilities, and tips for handling non-geocoded cases. Special consideration is given to privacy and confidentiality issues by focusing on disclosure limitation methods.

With recent disease outbreaks and escalating concerns about bioterrorism, interest in the application of GIS to individual data is growing. The fundamental concepts presented by this book are of great value to anyone trying to understand the causes, prevention, and control of cancer as well as a variety of other diseases.

### **From reader reviews:**

#### **Sheilah Harvey:**

Why don't make it to be your habit? Right now, try to prepare your time to do the important act, like looking for your favorite book and reading a publication. Beside you can solve your long lasting problem; you can add your knowledge by the reserve entitled Geocoding Health Data: The Use of Geographic Codes in Cancer Prevention and Control, Research and Practice. Try to face the book Geocoding Health Data: The Use of Geographic Codes in Cancer Prevention and Control, Research and Practice as your buddy. It means that it can for being your friend when you experience alone and beside those of course make you smarter than ever before. Yeah, it is very fortunate to suit your needs. The book makes you a lot more confidence because you can know every thing by the book. So , let's make new experience and also knowledge with this book.

#### **James Sanchez:**

In this 21st hundred years, people become competitive in every single way. By being competitive at this point, people have do something to make these survives, being in the middle of the particular crowded place and notice by simply surrounding. One thing that sometimes many people have underestimated it for a while is reading. Yeah, by reading a e-book your ability to survive enhance then having chance to stand up than other is high. To suit your needs who want to start reading a book, we give you this Geocoding Health Data: The Use of Geographic Codes in Cancer Prevention and Control, Research and Practice book as beginning and daily reading publication. Why, because this book is greater than just a book.

#### **Ellis Arnold:**

Information is provisions for anyone to get better life, information these days can get by anyone in everywhere. The information can be a know-how or any news even restricted. What people must be consider if those information which is within the former life are challenging to be find than now could be taking seriously which one works to believe or which one the resource are convinced. If you find the unstable resource then you understand it as your main information there will be huge disadvantage for you. All those possibilities will not happen throughout you if you take Geocoding Health Data: The Use of Geographic Codes in Cancer Prevention and Control, Research and Practice as the daily resource information.

#### **John Wiser:**

Exactly why? Because this Geocoding Health Data: The Use of Geographic Codes in Cancer Prevention and Control, Research and Practice is an unordinary book that the inside of the book waiting for you to snap the idea but latter it will shock you with the secret the item inside. Reading this book next to it was fantastic author who have write the book in such wonderful way makes the content inside easier to understand, entertaining way but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this any longer or you going to regret it. This phenomenal book will give you a lot of benefits than the other book include such as help improving your talent and your critical thinking way. So , still want to

hold off having that book? If I have been you I will go to the publication store hurriedly.
