The Changing University: How Increased Demand for Scientists and Technology is Transforming Academic Institutions Internationally (Nato Science Series D:)

This collection of papers was written for a NATO Advanced Research Workshop held at Harvard University in March 1990. The title, "The Changing University and the Education of Scientists and Engineers: An International Workshop," broad as it is, does not convey the sweep of data, information, opinions, and suggestions for future research and policy choices that were crowded into two-and-a-half days of formal presentations, mealtime discussions, and teatime chats. The proposal for the workshop grew out of a research project I had carried out that explored the policies governing the education of foreign science and engineering students (S&Es) in several industrialized countries, and of two countries that send large numbers of S&E students abroad - the People's Republic of China (PRC) and Japan (see chapter 7). In research visits to these countries as well as to France, the United Kingdom, West Germany, and within the United States, I was struck by the similarity of issues that were raised. One was the concern that there would not be enough well-trained scientists and engineers to meet the constantly increasing demand for them. Government officials, industrialists, and educators repeatedly stressed that a well-educated and -motivated work force was essential for their economies, national security, and for society as a whole. Many of those interviewed mentioned that universities are undergoing rapid, systemic changes as governments and industry are calling on them to provide human resources and intellectual capital.

From reader reviews:

Patricia Carter:

This The Changing University: How Increased Demand for Scientists and Technology is Transforming Academic Institutions Internationally (Nato Science Series D:) tend to be reliable for you who want to be a successful person, why. The explanation of this The Changing University: How Increased Demand for Scientists and Technology is Transforming Academic Institutions Internationally (Nato Science Series D:) can be one of several great books you must have is usually giving you more than just simple examining food but feed anyone with information that perhaps will shock your prior knowledge. This book is handy, you can bring it everywhere and whenever your conditions throughout the e-book and printed ones. Beside that this The Changing University: How Increased Demand for Scientists and Technology is Transforming Academic Institutions Internationally (Nato Science Series D:) forcing you to have an enormous of experience for instance rich vocabulary, giving you demo of critical thinking that we understand it useful in your day pastime. So , let's have it and enjoy reading.

John McKeever:

Reading a publication tends to be new life style within this era globalization. With looking at you can get a lot of information which will give you benefit in your life. Together with book everyone in this world can share their idea. Textbooks can also inspire a lot of people. A great deal of author can inspire their very own reader with their story or perhaps their experience. Not only situation that share in the guides. But also they write about the information about something that you need illustration. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors on earth always try to improve their ability in writing, they also doing some investigation before they write to the book. One of them is this The Changing University: How Increased Demand for Scientists and Technology is Transforming Academic Institutions Internationally (Nato Science Series D:).

Raymond Brown:

The particular book The Changing University: How Increased Demand for Scientists and Technology is Transforming Academic Institutions Internationally (Nato Science Series D:) has a lot details on it. So when you make sure to read this book you can get a lot of gain. The book was compiled by the very famous author. The writer makes some research before write this book. This book very easy to read you can get the point easily after scanning this book.

Courtney Osteen:

The Changing University: How Increased Demand for Scientists and Technology is Transforming Academic Institutions Internationally (Nato Science Series D:) can be one of your nice books that are good idea. We all recommend that straight away because this e-book has good vocabulary that could increase your knowledge in vocab, easy to understand, bit entertaining but nonetheless delivering the information. The author giving

his/her effort to place every word into joy arrangement in writing *The Changing University: How Increased Demand for Scientists and Technology is Transforming Academic Institutions Internationally* (Nato Science Series D:) but doesn't forget the main point, giving the reader the hottest and based confirm resource information that maybe you can be certainly one of it. This great information may drawn you into fresh stage of crucial contemplating.
