Green Transportation Basics: A Green Energy Guide Dan Chiras

Our automobile culture is devastating for the environment, but private passenger vehicles are unlikely to disappear from our roads anytime soon. Greener cars and fuels will be a necessity for many years to come.

Green Transportation Basics is a guide to greening your personal driving habits by dramatically improving the efficiency of an existing vehicle using simple measures such as trip planning and regular maintenance to improve fuel economy. This handy guide also explores the most promising new green cars and trucks, including electric vehicles, hybrids, plug-in hybrids, and natural-gas cars. And it critically examines sustainable fuels including ethanol, biodiesel, straight vegetable oil, hydrogen, and biomethane, evaluating each according to a set of established criteria. Each green fuel source must:

- Be socially, economically, and environmentally sustainable
- Have a high net energy yield
- Be clean, abundant, renewable, and affordable

Don't let your dream of greening your transportation idle—*Green Transportation Basics* will guide you through the myths and misconceptions and provide clear options for the road to a more sustainable future.

Dan Chiras is a respected educator and author who has published nearly thirty books on renewable energy and sustainable living, including *Power from the Sun* and *Power from the Wind*. He is the director of the Evergreen Institute, where he teaches workshops on green transportation, including green fuels and vehicles and electric car conversion.

Stacie Logan:

Playing with family in a very park, coming to see the marine world or hanging out with buddies is thing that usually you could have done when you have spare time, after that why you don't try matter that really opposite from that. One particular activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Green Transportation Basics: A Green Energy Guide, you may enjoy both. It is good combination right, you still need to miss it? What kind of hangout type is it? Oh come on its mind hangout fellas. What? Still don't buy it, oh come on its called reading friends.

Gary Collis:

As a student exactly feel bored in order to reading. If their teacher questioned them to go to the library as well as to make summary for some guide, they are complained. Just small students that has reading's spirit or real their hobby. They just do what the educator want, like asked to the library. They go to right now there but nothing reading significantly. Any students feel that examining is not important, boring along with can't see colorful images on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Green Transportation Basics: A Green Energy Guide can make you truly feel more interested to read.
