Pierre Grisvard Memorial Volume (Progress in Nonlinear Differential Equations and Their Applications)

Pierre Grisvard Memorial Volume (Progress in Nonlinear Differential Equations and Their Applications)

Pierre Grisvard, one of the most distinguished French mathematicians, died on April 22, 1994. A Conference was held in November 1994 out of which grew the invited articles contained in this volume. All of the papers are related to functional analysis applied to partial differential equations, which was Grisvard's specialty. Indeed his knowledge of this area was extremely broad. He began his career as one of the very first students of Jacques Louis Lions, and in 1965, he presented his "State Thesis" on interpolation spaces, using in particular, spectral theory for linear operators in Banach spaces. After 1970, he became a specialist in the study of optimal regularity for partial differential equations with boundary conditions. He studied singularities coming from coefficients, boundary conditions, and mainly non-smooth domains, and left a legacy of precise results which have been published in journals and books. Pierre Grisvard spent most of his career as a full professor at the University of Nice, where he started in 1967. For shorter or longer periods, he visited several foreign countries, and collaborated with some of the most famous mathematicians in his field. He was also an excellent organizer and directed a large number of Ph.D. students. Finally, this volume contains a bibliography of Grisvard's works as well as one paper which he wrote and which has not been published before.

From reader reviews:

Rickie Miller:

In this era which is the greater man or who has ability in doing something more are more important than other. Do you want to become one among it? It is just simple solution to have that. What you have to do is just spending your time little but quite enough to experience a look at some books. One of many books in the top listing in your reading list is Pierre Grisvard Memorial Volume (Progress in Nonlinear Differential Equations and Their Applications). This book which is qualified as The Hungry Hillside can get you closer in turning out to be precious person. By looking up and review this reserve you can get many advantages.

Shea Cross:

That book can make you to feel relax. This book Pierre Grisvard Memorial Volume (Progress in Nonlinear Differential Equations and Their Applications) was colorful and of course has pictures on there. As we know that book Pierre Grisvard Memorial Volume (Progress in Nonlinear Differential Equations and Their Applications) has many kinds or genre. Start from kids until teens. For example Naruto or Detective Conan you can read and feel that you are the character on there. So , not at all of book are usually make you bored, any it makes you feel happy, fun and loosen up. Try to choose the best book to suit your needs and try to like reading in which.

Rebecca Muldoon:

What is your hobby? Have you heard in which question when you got scholars? We believe that that problem was given by teacher with their students. Many kinds of hobby, Every person has different hobby. So you know that little person including reading or as examining become their hobby. You have to know that reading is very important and book as to be the thing. Book is important thing to provide you knowledge, except your teacher or lecturer. You get good news or update with regards to something by book. Numerous books that can you go onto be your object. One of them are these claims Pierre Grisvard Memorial Volume (Progress in Nonlinear Differential Equations and Their Applications).

David Murray:

Reading a publication make you to get more knowledge as a result. You can take knowledge and information from a book. Book is composed or printed or created from each source which filled update of news. Within this modern era like currently, many ways to get information are available for you. From media social such as newspaper, magazines, science reserve, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to spread out your book? Or just seeking the Pierre Grisvard Memorial Volume (Progress in Nonlinear Differential Equations and Their Applications) when you essential it?
