Understanding Research: Coping with the Quantitative - Qualitative Divide M.I. Franklin

Planning, undertaking and completing a research project – from dissertations to presentations - can be a daunting undertaking for any student, involving a number of easily taken mis-steps for those without adequate guidance.

The objective of any research project is to gather data, analyse it based on your research question and present your findings and conclusions. For students, having the right approach to these steps can mean the difference between an easily handled process resulting in a well argued and presented project, or panicked flailing, misdirection and confusion.

For those fearful of not getting enough research done, doing it the wrong way, putting it together incorrectly, or unsure of what the end result will be, then *Understanding Research* is an invaluable guide to getting it right and putting fears to bed.

Successfully completing a research project is a major milestone in most university degrees, and it should be daunting – although not unassailable. This book provides students with the guidance necessary to start, undertake and present their research project in social science or the humanities.

This text addresses:

- Where do I start? How do I begin my research and pull it together into a research question? - takes the student through the process of project design, starting research and gaining confidence in their choices
- *Am I Researching the right things? Is it taking me in the direction I want to go? What direction is it taking me in?* - explores the decision making process at all points of a research project and the implications of these decisions in the longer term
- *Am I researching in the right way – should I be conducting interviews, reading articles or collecting statistical data?* - outlines the practical and philosophical conundrums around specific techniques for gathering and analysing data

Focussed explicitly on the needs and experiences of students and including a wealth of practical tips, this work is an essential resource for all students embarking on a research project.

Understanding Research includes:

- 90 illustrations
- 2 tables
- 21 text boxes
