- A useful resource to supplement more in-depth textbooks for students
- A primary study resource for those individuals preparing to take the Associate Safety Professional (ASP), Certified Safety Professional (CSP), Occupational Health and Safety Technologist (OHST), and the Construction Health and Safety Technologist (CHST) examination

The book covers topics such as math review, ventilation, noise, gases and particulates, radiation, toxicology, industrial hygiene, biological hazards, thermal stressors, statistics, fire protection and prevention, accident investigation, mechanics, hydrostatics and hydraulics, electrical safety, engineering economy, and workers compensation. It provides step-by-step instructions on how to solve the equations and formulas on the exam and gives examples on how and when to use them.

With roots that extend as far back as 1700 B.C., the safety profession has evolved over the centuries. Passage of legislation has highlighted the need for educated and knowledgeable professionals and changes in science and technology requires them to have a broad range of knowledge in areas such as biology, chemistry, mathematics, and chemistry. This book consolidates practical information and puts it within easy reach, saving you the time and trouble of searching through a myriad of resources to find what you need.
