Implement demand driven smart metrics to drive and sustain dramatic gains in flow and improve ROI performance

What if the objective of minimizing unit product cost that is hard coded into all reporting and measurement systems is simply "bad math" that drives decisions and actions that destroy ROI?

In today's volatile, globally competitive environment, new decision-making tools are required to monitor, measure, and improve total organizational performance. Adherence to "old" operational rules, tools, and behaviors is killing competitiveness in most enterprises. A fundamental shift is required. Cowritten by internationally recognized experts in the field, Demand Driven Performance explains why current measurement forms must be replaced. The authors present a demand driven blueprint and the smart metrics to maximize flow and ROI.
