Metric Spaces

Satish Shirali, Harkrishan Lal Vasudeva

Metric Spaces Satish Shirali, Harkrishan Lal Vasudeva
This volume provides a complete introduction to metric space theory for undergraduates. It covers the topology of metric spaces, continuity, connectedness, compactness and product spaces, and includes results such as the Tietze-Urysohn extension theorem, Picard's theorem on ordinary differential equations, and the set of discontinuities of the pointwise limit of a sequence of continuous functions. Key features include: a full chapter on product metric spaces, including a proof of Tychonoff's Theorem a wealth of examples and counter-examples from real analysis, sequence spaces and spaces of continuous functions numerous exercises – with solutions to most of them – to test understanding. The only prerequisite is a familiarity with the basics of real analysis: the authors take care to ensure that no prior knowledge of measure theory, Banach spaces or Hilbert spaces is assumed. The material is developed at a leisurely pace and applications of the theory are discussed throughout.

From reader reviews:

Alvin Pryor:

Hey guys, do you desires to finds a new book to study? May be the book with the title Metric Spaces suitable to you? The book was written by well known writer in this era. The book untitled Metric Spacesis a single of several books that will everyone read now. This book was inspired a number of people in the world. When you read this publication you will enter the new way of measuring that you ever know before. The author explained their idea in the simple way, thus all of people can easily to be aware of the core of this book. This book will give you a lot of information about this world now. In order to see the represented of the world on this book.

Charles Siegrist:

People live in this new day of lifestyle always make an effort to and must have the time or they will get wide range of stress from both day to day life and work. So , whenever we ask do people have spare time, we will say absolutely indeed. People is human not really a robot. Then we consult again, what kind of activity are you experiencing when the spare time coming to you of course your answer will probably unlimited right. Then do you ever try this one, reading publications. It can be your alternative throughout spending your spare time, typically the book you have read is definitely Metric Spaces.

Rose Knowlton:

Do you one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Try to pick one book that you never know the inside because don't evaluate book by its protect may doesn't work the following is difficult job because you are frightened that the inside maybe not because fantastic as in the outside look likes. Maybe you answer is usually Metric Spaces why because the great cover that make you consider regarding the content will not disappoint anyone. The inside or content is usually fantastic as the outside or perhaps cover. Your reading 6th sense will directly make suggestions to pick up this book.

Mary Muncy:

Reading a book being new life style in this 12 months; every people loves to go through a book. When you go through a book you can get a great deal of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information on it. The information that you will get depend on what sorts of book that you have read. If you need to get information about your research, you can read education books, but if you act like you want to entertain yourself read a fiction books, these us novel, comics, along with soon. The Metric Spaces provide you with a new experience in reading through a book.
