**Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations)** Luciano Alparone, Bruno Aiazzi, Stefano Baronti, Andrea Garzelli

A synthesis of more than ten years of experience, **Remote Sensing Image Fusion** covers methods specifically designed for remote sensing imagery. The authors supply a comprehensive classification system and rigorous mathematical description of advanced and state-of-the-art methods for pansharpening of multispectral images, fusion of hyperspectral and panchromatic images, and fusion of data from heterogeneous sensors such as optical and synthetic aperture radar (SAR) images and integration of thermal and visible/near-infrared images. They also explore new trends of signal/image processing, such as compressive sensing and sparse signal representations.

The book brings a new perspective to a multidisciplinary research field that is becoming increasingly articulate and comprehensive. It fosters signal/image processing methodologies toward the goal of information extraction, either by humans or by machines, from remotely sensed images. The authors explain how relatively simple processing methods tailored to the specific features of the images may be winning in terms of reliable performance over more complex algorithms based on mathematical theories and models unconstrained from the physical behaviors of the instruments.

Ultimately, the book covers the births and developments of three generations of RS image fusion. Established textbooks are mainly concerned with the earliest generation of methods. This book focuses on second generation methods you can use now and new trends that may become third generation methods. Only the lessons learned with second generation methods will be capable of fostering the excellence among the myriad of methods that are proposed almost every day by the scientific literature.

### **From reader reviews:**

#### **Gemma Jackson:**

Do you among people who can't read gratifying if the sentence chained inside straightway, hold on guys this aren't like that. This Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations) book is readable by you who hate the straight word style. You will find the information here are arrange for enjoyable reading experience without leaving actually decrease the knowledge that want to provide to you. The writer connected with Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations) content conveys prospect easily to understand by many individuals. The printed and e-book are not different in the content but it just different such as it. So , do you still thinking Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations) is not loveable to be your top record reading book?

#### **Elizabeth Rodrigues:**

The publication with title Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations) has a lot of information that you can study it. You can get a lot of gain after read this book. This particular book exist new understanding the information that exist in this publication represented the condition of the world right now. That is important to yo7u to find out how the improvement of the world. This specific book will bring you within new era of the the positive effect. You can read the e-book with your smart phone, so you can read the idea anywhere you want.

#### **Judith Carter:**

In this particular era which is the greater particular person or who has ability to do something more are more valuable than other. Do you want to become certainly one of it? It is just simple approach to have that. What you need to do is just spending your time not much but quite enough to experience a look at some books. One of many books in the top record in your reading list is definitely Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations). This book that is certainly qualified as The Hungry Mountains can get you closer in growing to be precious person. By looking up and review this publication you can get many advantages.

#### **Arthur Smith:**

Publication is one of source of knowledge. We can add our understanding from it. Not only for students but native or citizen have to have book to know the revise information of year to year. As we know those guides have many advantages. Beside we all add our knowledge, can bring us to around the world. By book Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations) we can consider more advantage. Don't you to definitely be creative people? To be creative person must want to read a book. Just choose the best book that suited with your aim. Don't always be doubt to change your life by this book Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations). You can more inviting

than now.
