Las damas del laboratorio: Mujeres científicas en la historia (Spanish Edition) María José Casado

El anonimato ha perseguido, históricamente, a las mujeres dedicadas a la ciencia. Han sido sometidas al desprecio por sus colegas, y han sufrido la indiferencia de las instituciones académicas y, en muchos casos, la apropiación de sus descubrimientos por parte de compañeros ante el silencio cómplice de la comunidad científica masculina. Esta obra pretende sacar a la luz sus trabajos y vidas, y destacar tanto las dificultades que tuvieron que superar como su impresionante contribución al desarrollo de sus respectivas disciplinas.

En este libro, narrado con amenidad y profusión de detalles que harán sonrojar a más de un hombre, María José Casado ha buceado en archivos y bibliotecas para desvelar la trayectoria de científicas que superaron el rechazo social, auténticas pioneras en sus respectivos campos del saber, que impulsaron -con su talento, inteligencia y esfuerzo personal- el camino de la ciencia. De Hipatia de Alejandría a la paleontóloga Mary Leakey, pasando por Marie Curie, Émilie de Châtelet, Rosalind Franklin, Lise Meitner, Ada Lovelaceo la española María Andrea Casamayor, este ejercicio de memoria y reivindicación del papel de la mujer en el saber universal permitirá valorar, en su justa medida, su destacada contribución al progreso científico.

Todas ellas nos sirven de ejemplo a las mujeres científicas que en la actualidad luchamos para alcanzar en el mundo científico el puesto que nos corresponda de acuerdo con nuestra capacidad.
