**Exposure-Response Modeling: Methods and Practical Implementation (Chapman & Hall/CRC Biostatistics Series)** Jixian Wang

*Discover the Latest Statistical Approaches for Modeling Exposure-Response Relationships*

Written by an applied statistician with extensive practical experience in drug development, **Exposure-Response Modeling: Methods and Practical Implementation** explores a wide range of topics in exposure-response modeling, from traditional pharmacokinetic-pharmacodynamic (PKPD) modeling to other areas in drug development and beyond. It incorporates numerous examples and software programs for implementing novel methods.

The book describes using measurement error models to treat sequential modeling, fitting models with exposure and response driven by complex dynamics, and survival analysis with dynamic exposure history. It also covers Bayesian analysis and model-based Bayesian decision analysis, causal inference to eliminate confounding biases, and exposure-response modeling with response-dependent dose/treatment adjustments (dynamic treatment regimes) for personalized medicine and treatment adaptation.

Many examples illustrate the use of exposure-response modeling in experimental toxicology, clinical pharmacology, epidemiology, and drug safety. Some examples demonstrate how to solve practical problems while others help with understanding concepts and evaluating the performance of new methods. The provided SAS and R codes enable readers to test the approaches in their own scenarios.

Although application oriented, this book also gives a systematic treatment of concepts and methodology. Applied statisticians and modelers can find details on how to implement new approaches. Researchers can find topics for or applications of their work. In addition, students can see how complicated methodology and

models are applied to practical situations.

### **From reader reviews:**

#### **Glenn Hancock:**

As people who live in the modest era should be up-date about what going on or data even knowledge to make these keep up with the era that is certainly always change and move forward. Some of you maybe may update themselves by reading books. It is a good choice in your case but the problems coming to you is you don't know which you should start with. This Exposure-Response Modeling: Methods and Practical Implementation (Chapman & Hall/CRC Biostatistics Series) is our recommendation so you keep up with the world. Why, because this book serves what you want and want in this era.

#### **Charlene Stidham:**

Now a day individuals who Living in the era where everything reachable by match the internet and the resources within it can be true or not require people to be aware of each information they get. How individuals to be smart in receiving any information nowadays? Of course the answer then is reading a book. Reading through a book can help persons out of this uncertainty Information particularly this Exposure-Response Modeling: Methods and Practical Implementation (Chapman & Hall/CRC Biostatistics Series) book as this book offers you rich data and knowledge. Of course the knowledge in this book hundred per cent guarantees there is no doubt in it you know.

#### **Violet Iverson:**

The book with title Exposure-Response Modeling: Methods and Practical Implementation (Chapman & Hall/CRC Biostatistics Series) contains a lot of information that you can discover it. You can get a lot of gain after read this book. That book exist new understanding the information that exist in this guide represented the condition of the world at this point. That is important to yo7u to know how the improvement of the world. This specific book will bring you in new era of the syndication. You can read the e-book on the smart phone, so you can read the idea anywhere you want.

#### **Doris Garcia:**

As we know that book is very important thing to add our knowledge for everything. By a reserve we can know everything we really wish for. A book is a list of written, printed, illustrated as well as blank sheet. Every year seemed to be exactly added. This publication Exposure-Response Modeling: Methods and Practical Implementation (Chapman & Hall/CRC Biostatistics Series) was filled regarding science. Spend your extra time to add your knowledge about your technology competence. Some people has various feel when they reading the book. If you know how big benefit from a book, you can truly feel enjoy to read a publication. In the modern era like currently, many ways to get book which you wanted.
